

Planets Mnemonic (Memory Aid)

A mnemonic is a way of remembering something, like the order of the planets in our solar system. To make one, we need to look at the first letter of each planet's name.

An example of a mnemonic for the order of the planets is:
**Many Vile Earthlings Munch Jam Sandwiches Under
Newspaper**

Now it's your turn! Remember, you need to use words that start with the same first letter as the name of the planets. It can be as sensible or as silly as you'd like!

 MERCURY	
VENUS 	
 EARTH	
MARS 	
 JUPITER	
SATURN 	
 URANUS	
NEPTUNE
